Power BI in Higher Education: Real Use Cases from Enrollment to Graduation

Andrew Sommer

Lakshmi Ponnurasan

Let's Imagine...

A student named Maya.

- Applied in Fall 2024
- First-generation student
- Interested in Biology
- Received financial aid
- Lives on campus

Her Journey...

She applies → data lives in the CRM (Slate)

She enrolls → now she's in the SIS (Peoplesoft)

She takes classes → activity tracked in the LMS

She receives financial aid → finance system

She changes majors → advising system

She graduates → alumni system

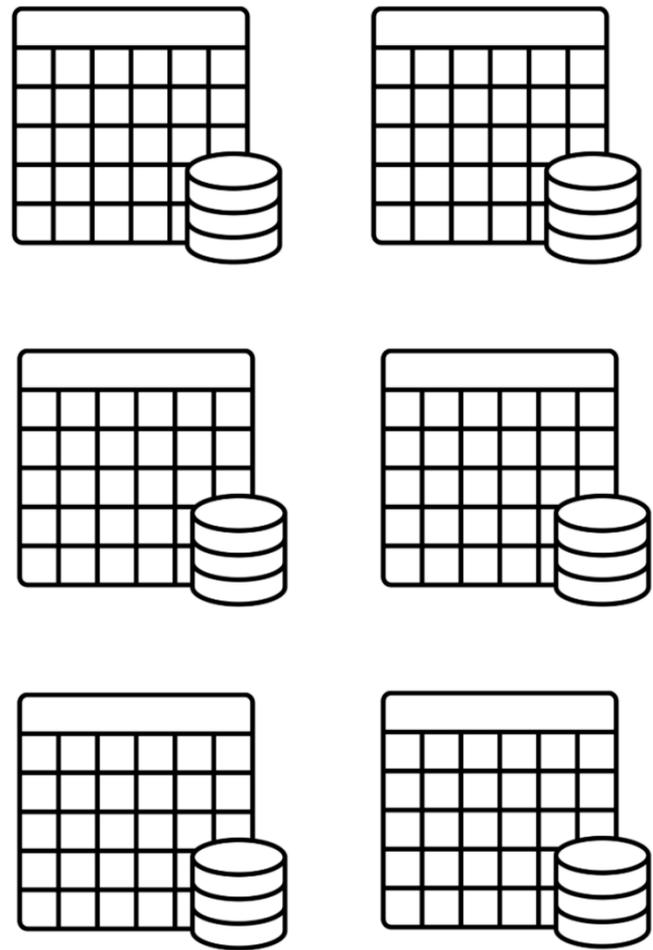

The Silo Problem (Great Data. Disconnected Systems)

Every stage generates data.
But each stage lives in a different system.

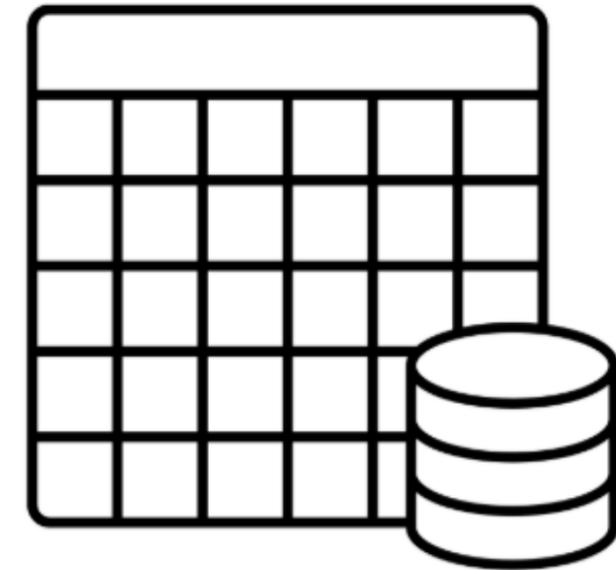

The Silo Problem (Great Data. Disconnected Systems)

Fabric & Power BI : Connecting the Lifecycle

Scattered systems

Unified single model

Power BI in Higher Education: Real Use Cases from Enrollment to Graduation

Finalist

Data Analyst- Institutional Effectiveness

Session Disclaimer

- ⚠ This session reflects **our implementation approach**.
- ⚠ What works for us may look different in your institution.
- ⚠ Demo reports use **fictionalized sample data**.
- ⚠ The goal is to show **how we use** Microsoft Fabric and Microsoft Power BI at Missouri Science and Technology.

Take ideas. Adapt thoughtfully. Build intentionally.

Game Plan

- 🎯 Key Challenges in Higher Ed Data
- 🎯 Modeling in Higher Education
- 🎯 Power BI in action: 4 Real Use Cases
- 🎯 3 Things We Do Intentionally
- 🎯 Bonus: Storytelling Frameworks

Key Challenges

- Data spread across **multiple systems**
- **Different definitions** across departments
- **Complex** cohort and lifecycle **logic**
- **Multiple grains of data** (student, term, course)
- Slowly **changing dimensions** (major changes, advisor changes)
- **FERPA / Privacy** considerations

3 Things We Do Intentionally

1 Documentation Built Into the Report

About the Page

User Guide

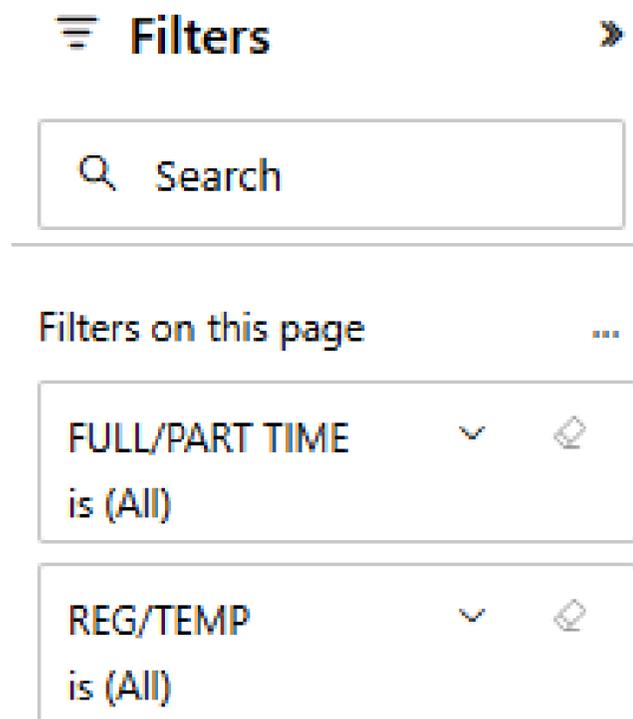

Support

Demo

3 Things We Do Intentionally

2 Consistent Global Filters (Filter Pane)

3 Things We Do Intentionally

3 Intentional Drill Experience

- Drill Down: From College → Program → Major
- Drill Through: From Retention Summary → Student Detail
- Tooltip pages for context
- No unnecessary navigation clutter

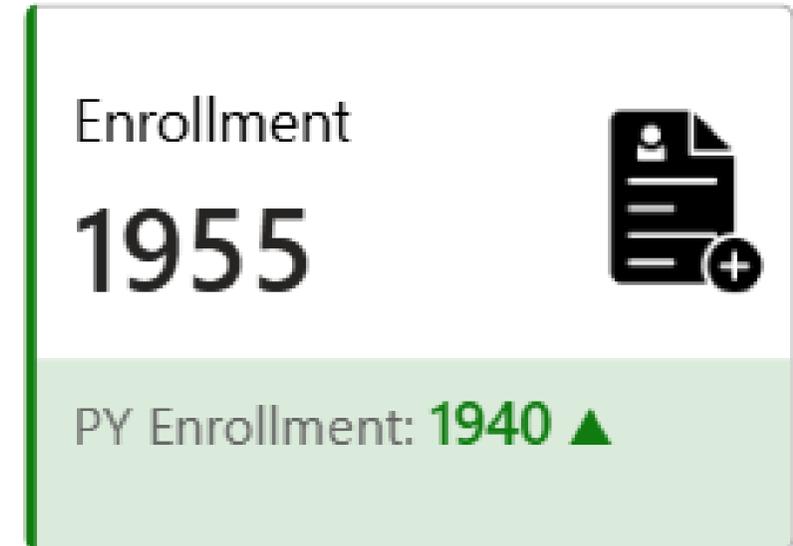

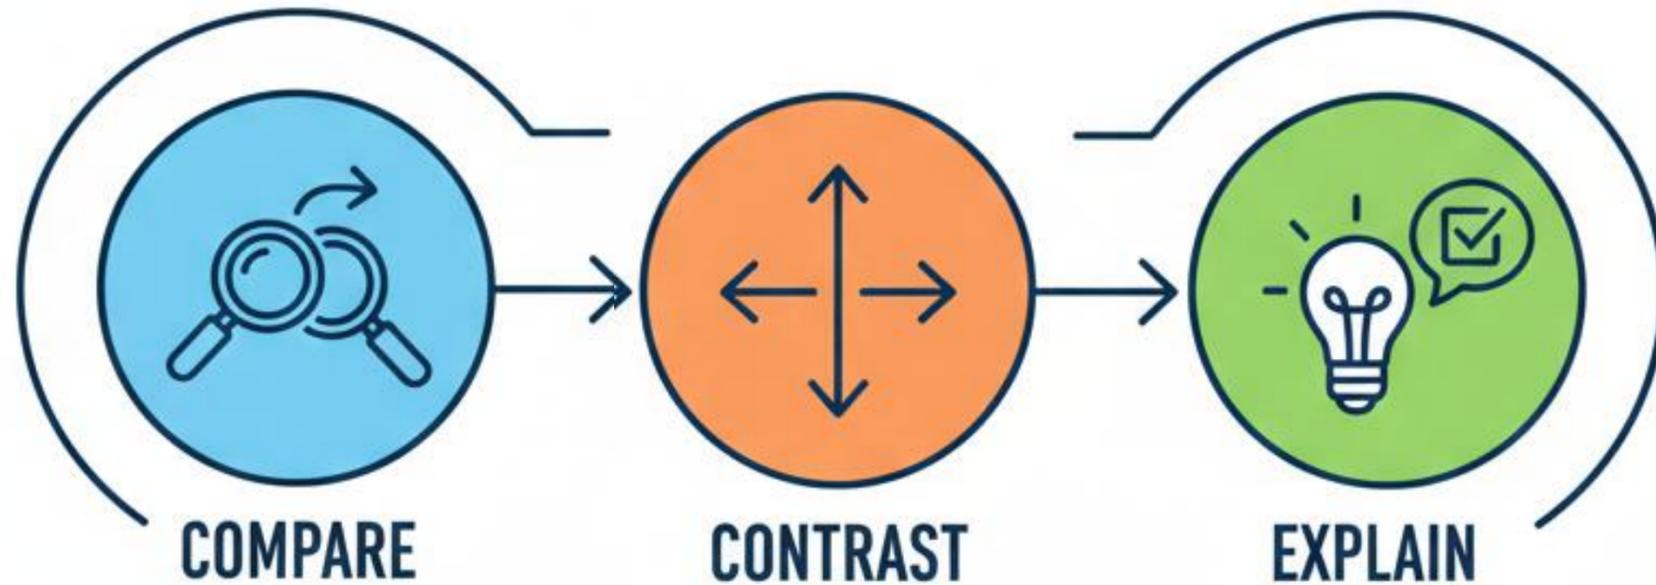

BONUS:

Storytelling Frameworks That You Could Use

1. The Comparison Framework
2. The Martini Glass Framework

1. The Comparison Framework

Compare (Establish a baseline) → **Contrast** (Reveal differences) → **Explain** (Provide reasons/ implications)

2. The Martini Glass Framework

Start broad

Funnel to insight

Open up for exploration

**Don't forget to rate our session
and leave some feedback!**
